SUPERVISED LEARNING NEURAL NETWORK

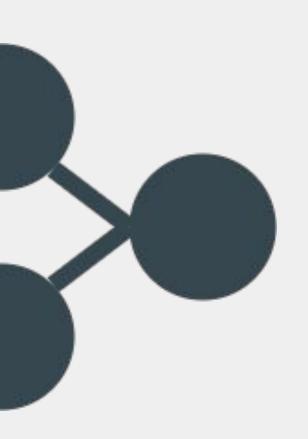

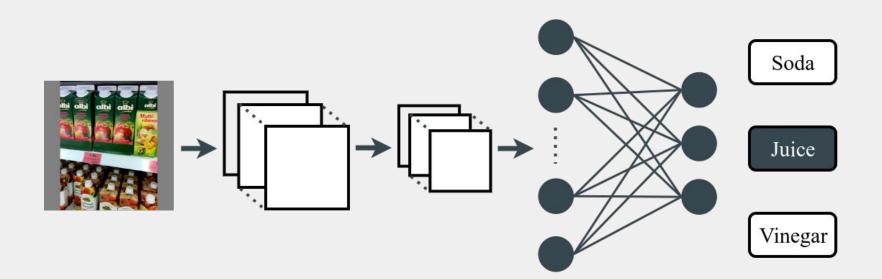

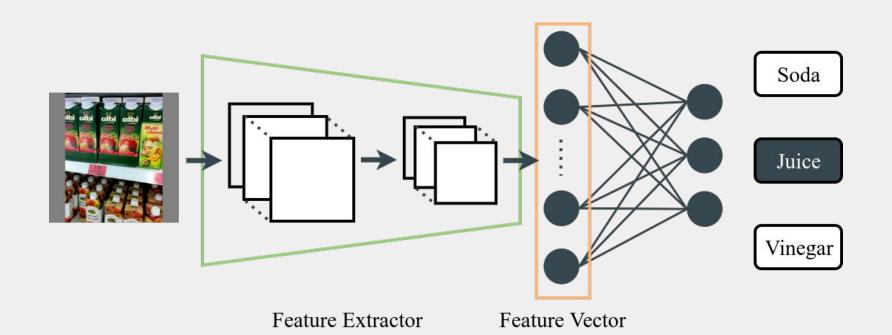

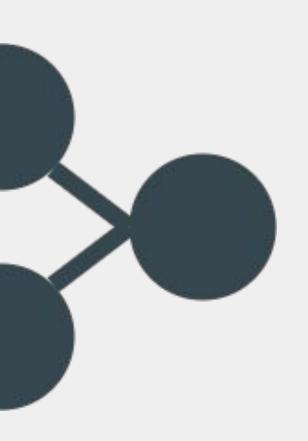

Feature Vector

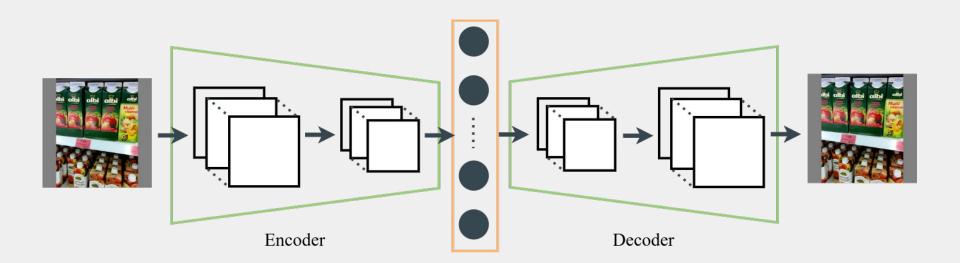

DEEP LEARNING

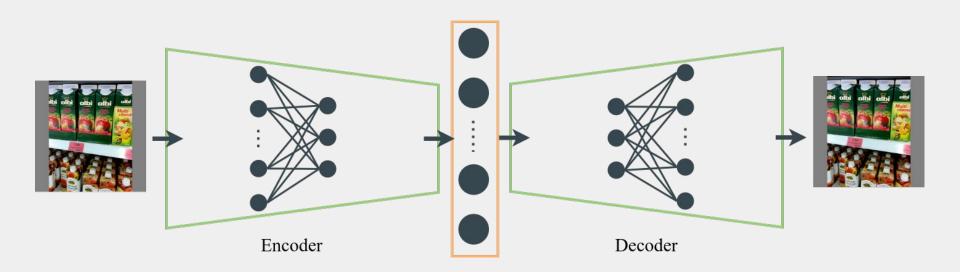

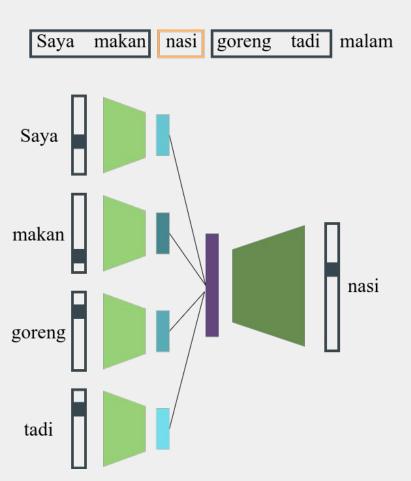

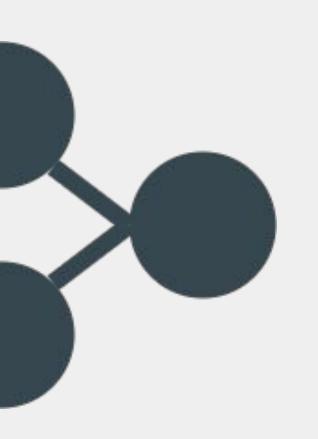

AUTO ENCODER

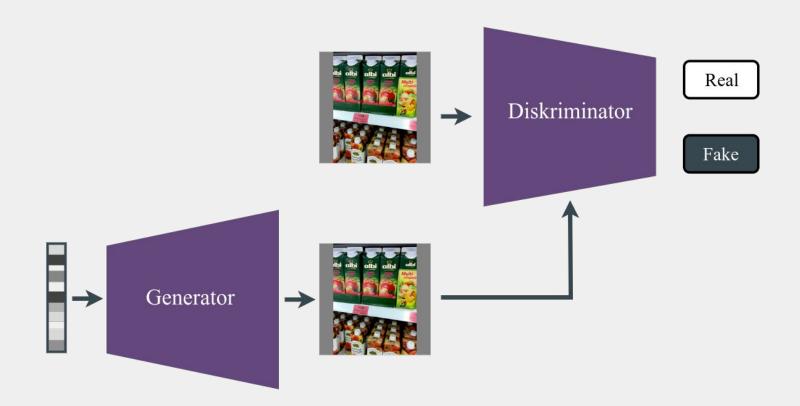

GENERATIVE ADVERSASIAL NETWORK

Nash Equilibrium

Ketika masing-masing pemain sudah tidak bisa meng-improve diri dalam permainan

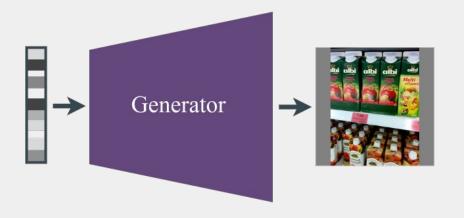

Real

Fake

- Klasifikasi biasa
- Leaky ReLU untuk fungsi aktivasi
- Sigmoid untuk fungsi aktivasi layer terakhir. Sigmoid memetakan output antara 0 dan 1.
- Menggunakan Label Smoothing untuk menghindari Over Confidence Model

- Input adalah latent vector (vektor dengan random value)
- Leaky ReLU untuk fungsi aktivasi
- Tanh untuk fungsi aktivasi layer terakhir.
 Tanh memetakan output antara -1 dan 1 sehingga bisa direpresentasi menjadi citra.

TERIMA KASIH;)
